PERSONAL PROJECTS

Food Delivery Website (Swiggy Clone)

- Developed a Food Delivery Website application using React and Restful Api.
- Created a food delivery website inspired by Swiggy, aimed at providing a seamless online food ordering experience.
- The platform features a dynamic user interface where customers can browse through a variety of restaurants, view menus and place orders.

Weather App

- Create a Dynamic Weather application using React JS to provide real-time weather updates, including temperature, humidity, and forecasts for any location
- The app fetches real-time weather data using a third-party weather API and displays it in a clean, user-friendly interface.

User Info Hub

- Developed a User Info Hub using React JS, Bootstrap and Restful API.
- Designed to collect, store, and display user information such as names, email addresses, and phone numbers. Utilizing a RESTful API.
- The application allows users to input their details, which are then stored securely and presented in a user-friendly table format.

Tax Invoice Generator

- Developed a Tax Invoice application using HTML, CSS, JavaScript and Bootstrap5.
- Designed and Developed a Tax Invoice application, aimed at automating generation.
- The system provides features for creating invoices, calculating taxes and generate the report as a PDF format.

To-Do-List Application

- Created a To-Do-List application using HTML, CSS, JavaScript.
- This project allows users to manage tasks efficiently with features such as task creation, editing and deletion.
- This application ensured a seamless user experience with responsive design and mobile optimization.

Restaurant Website

- Create a Restaurant Website using HTML, CSS, JavaScript
- Developed a responsive and user-friendly website for a local restaurant, enhancing their online presence and customer engagement.

CERTIFICATIONS

- Frontend Development - Spotknack Community
